

Dear Captain Hoyte -

Thank you so much for the most enjoyable time I had when I visited Sim-Fly Norfolk last week.

The information sheet that you handed me afterwards was most useful. I believe that I have a client who could have been affected by Acrototoxic Poisoning.

She had a trip to Canada a couple of years ago & was smacked down with a mysterious ailment that has left her in a most debilitated state. Her consultants were unable to give her a definite diagnosis, & from her description & how she presents - it sounds very like A.P.

I'm going to scan the sheet that you gave me & send it to her, for her perusal.

I hope that she finds it of use.

I hope that you do not deteriorate at all, as it would be such a shame. I'm pleased that you are able to enjoy aviation related activities - but it should not have been at the expense of your health.

Kind regards,
